

## *The Ball Park Springfield, New Jersey*

The Ball Park project, transformed an industrial warehouse into a state-of-the-art youth athletic training facility.

The industrial to public space conversion included special equipment, a food service area, a training area, pro shop and adequate infrastructure to accept future modifications.

At the completion of the project, Blue Rock met and exceeded the owner's desire for an attractive, safe and youth friendly space that conveys a "Major League" style training facility.

"Not only were the construction requirements met, they were greatly enhanced through Blue Rock's involvement... [BRCI's] teamwork approach allowed decisions to be made in an effort to address "The Ballpark" needs without suffering delays or quality."

- Frank Ricciuti, President
