

 **Kimberly-Clark**  
*Distribution Center*  
*Logan Township, New Jersey*

Blue Rock Construction delivered a 600,000-square-foot distribution center for Kimberly-Clark in Logan Township, N.J.

The project featured precast concrete wall panels and structural steel fabrication as well as infrastructure and utility installation.

In addition to constructing a new state-of-the-art facility, Blue Rock, Kimberly-Clark and DP Partners initiated the process of gaining LEED certification for this project.

As part of the sustainability process for this Kimberly-Clark facility, all concrete for the floor slab dock pads and foundation was provided by an on-site batch plant.

Kimberly-Clark Corporation is a global health and hygiene company with operations in 35 countries,
