

## Penn Cardiac Care *at* Mercer Bucks

Penn Medicine

As the largest Cardiovascular Specialty Group in Mercer/Bucks County region, Penn Cardiac Care at Mercer Bucks was faced with the challenge of expanding their Facilities in both Pennsylvania and New Jersey. Because of the specialty nature of their practice, Penn Cardiac Care at Mercer Bucks turned to Blue Rock's knowledge, commitment and integrity with Specialty Construction Projects.

The projects which took place in Lawrenceville, Hamilton, Robbinsville, Trenton, NJ and Yardley, PA included cardiovascular testing rooms, exam rooms, clinical labs, nuclear labs and nuclear stress rooms, a strict supplemental air conditioning, and supplemental structural steel requirements, in existing occupied spaces.

Throughout every construction project, tremendous care was taken to properly coordinate all upscale requirements of the client. In addition, all projects included pre construction services, assistance with design development, extensive value engineering, and coordination of all move-in requirements for equipment, furniture, and Commissioning.
