To Whom It May Concern,

CAMcare Health Corporation has been a trusted name since 1978 for the entire community of Camden City and Camden County. Our eight primary locations have helped propel us into being one of the largest Federally Qualified Health care providers in the area. Patients come to CAMcare because they know they will be treated with great care and compassion by our concerned, highly qualified medical staff.

We first became involved with Blue Rock Construction in August 2009, for a complete call center renovation. The ease with which the Blue Rock team handled this project was perfect. Our next project together was October of the same year. This required Blue Rock to replace all the windows and re-point the brick facades on our facility in Paulsboro. All the work had to be done while we were fully operational, seeing patients. All this was done without any issues or delays.

In March of this year, we contracted with Blue Rock Construction, for a complete renovation at our South Camden Facility. Blue Rock maintained a strong presence on site with all their subcontractors to complete the project four days early. This is a sign of their professionalism and understanding of a client's needs.

CAMcare Health Corporation is committed to continuously maintaining and improving our facilities, and we appreciate your efforts to achieve these goals. I personally value the relationship between our organizations. I look forward to working with Blue Rock on future projects as CAMcare grows and evolves.

Sincerely,

A handwritten signature in black ink, appearing to read "David Hartshorne", written in a cursive style.

David Hartshorne
Director of Facilities
