CardinalHealth

July 27, 2004

To Whom It May Concern:

With Cardinal Health's ongoing growth, I have been extremely busy in recent years overseeing construction projects throughout the country. Our projects are extremely challenging with the presence of intense scheduling, cost and quality issues. As a result, one of our most critical decisions has become choosing the right construction firms. Although cost is definitely a key factor, we also needed a construction firm with the knowledge, professionalism and integrity who most emulates Cardinal Health's philosophy. Such firms ensure that the project runs smoothly while satisfying all of Cardinal Health's Development and Construction objectives.

When faced with the decision to choose a contractor for our 240,000 sf facility in Swedesboro, NJ, Cardinal narrowed the field to two distinctively different companies. In choosing Blue Rock, Cardinal Health made a calculated decision that your firm would provide the more personal touch of a small company without sacrificing any lack of resources or company depth. During their presentation, Blue Rock did an excellent job in convincing Cardinal Health of your abilities, but most important, Blue Rock delivered on everything that they promised. Needless to say, we are very happy with the choice we made because Blue Rock did not disappoint us during any aspect of the project. Choosing a larger firm may have been considered the safer option, but our experience with Blue Rock has shown Cardinal Health that we made the best choice. With Blue Rock Construction, we found the company who not only thoroughly satisfied our objectives but also satisfied our company philosophy with regards to integrity, honesty and a teamwork approach.

An extraordinary performance was achieved by Blue Rock Construction through the efforts of the entire staff and I welcome the opportunity to work with Blue Rock on future projects.

Very truly yours,

Ken Douglas
Director of Project Development
Enterprise Real Estate
