April 26, 2006

To Whom It May Concern,

I had the enormous pleasure of working with Blue Rock Construction during the last 2 years on the construction of a 13,440 square foot medical facility.

I am currently the Chief Operating Officer for the Henry J. Austin Health Center. We are a Federally Qualified Health Center in Trenton New Jersey. We are a not-for-profit organization with one main facility and three satellites with over 60,000 annual visits generated by 14,000 patients.

We found ourselves out growing our Healthcare for the Homeless facility which was only 1500 square feet. Many different solutions were bantered about until we resolved that building a new site from the ground up, which would allow us to introduce new services to the population that we serve, it was the right way to go.

I would like to preface the next paragraph by stating that I have had no previous construction management experience. The expertise and easy camaraderie that Blue Rock Construction brought to the table made all of the difference.

The sub-contractors that Blue Rock selected worked for the most part according to schedule and produced a quality product. Whenever issues arose, Blue Rock handled them with a professionalism that I found quite refreshing. At no time did I ever feel as though the project was not on the right course.

The level of customer service that Blue Rock provided from the inception of the project up to the quality of the Close-out documents was of the highest level. I would recommend them for any size job and am hoping to work with them again on future projects for this health center.

Sincerely,

A handwritten signature in black ink, appearing to read 'Susanne Johnson', written over a horizontal line.

Susanne Johnson  
Chief Operating Officer
