March 23, 2007

To Whom It May Concern,

I am writing this letter to commend Blue Rock Construction Inc (BRCI) for the high level of performance that I have experienced with their project team. Over the past four years Jones Lang LaSalle (JLL) has solicited BRCI's involvement in a number of projects. I am pleased to say that the BRCI team performed remarkably well under aggressive timeframes and budgetary requirements on every occasion.

I personally worked with Blue Rock on the Cisco Office Relocation project in Wall Township, New Jersey. This project was of great importance to Cisco Systems and Jones Lang LaSalle (JLL), as the Owner's Representative. This particular facility was of utmost importance due to the need to relocate Cisco's existing computer laboratory to the new location with no unscheduled operational "down time". BRCI worked with JLL to complete the project design and specifications, select sub-contractors, perform the required renovations at the new location and complete work on time for a weekend "turnover" from the existing facility to the new facility. BRCI was able to meet the project requirements within a 5-month schedule and without missing any of the important intermediate milestones. With the help of BRCI, JLL was able to not only meet but also exceed our client's expectations.

I look forward to working with Blue Rock on current and future opportunities and would encourage others who are seeking high-level performance and quality to contact them as well.

Sincerely,

Jones Lang LaSalle, Inc.
