

June 29, 2009

To All Interested Parties:

In 2008 Blue Rock Construction was contracted under DP Partners Development to provide a 600,000 SF “build-to suit” distribution center in Logan Township, NJ. This facility, which will be solely leased by Kimberly-Clark Corporation and operated by NFI Industries, is scheduled to come on-line in early August 2009. I am writing this e-mail to recognize Blue Rock Construction and their ability to deliver a truly quality product in a timely manner and treat our project as if it were their own. They worked closely with us throughout this process to insure all requirements were addressed to OUR satisfaction. Blue Rock and their construction teams have taken it upon themselves to ensure accurate communication regarding all aspects of the project. This has put the facility on track to be delivered to KC specifications. They have shown that they are a very customer focused construction group, with the flexibility and agility to adapt to the changing needs of their customer.

Blue Rock in conjunction with the developers has also shown a great commitment to sustainability for this site by targeting a LEED certification for the site, adhering to all of the customer specific environmental improvements, and presenting us with additional recommendations on environmental and sustainable benefits for this facility.

As the Project Manager for this joint venture I can say that Blue Rock Construction has exceeded all of our expectations thus far. They have shown that their experience in this region and attention to detail can provide a truly stellar facility.

Please feel free to contact me if you need any additional information about Blue Rock Construction as it pertains to this project.

Sincerely,

*Jason J. Ferry*  
**Kimberly-Clark Corporation**
