To whom it may concern,

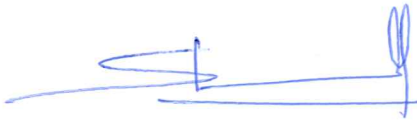

Blue Rock Construction Inc, recently completed a renovation of a 51,000 sq.ft facility for GGB Bearings Inc in Thorofare, NJ.

From the beginning of the project, Blue Rock took on a very proactive approach. They provided GGB with all the required submittals prior to notice to proceed. This approach helped in accelerating the schedule which was already compressed from the start.

GGB's plant relocation project was completely dependent on the timely completion of the construction work. Blue Rock completed the work in the committed time and under budget. We would like to make special mention of Jason Quenzel, Jim Gorman and Julio Ciabattoni for their commitment in ensuring the scheduling and coordination of activities.

We look forward to doing future business with Blue Rock Construction.

Best Regards,

Ravi Chitrabhanu
Project Manager

Paul Cameron
Plant Manager
