Cameron Barr, Vice President  
Blue Rock Construction  
1712 Hancock Lane  
Burlington, NJ 08016

It has been a pleasure to work with Blue Rock Construction on two new experiential retail stores at the Richard Gilder Center for Science, Education, and Innovation, the newest addition to the landmark American Museum of Natural History in New York City.

This was our first project together, yet beginning with my earliest communications with you, I was confident that by working together our project would be a success. As the project progressed, and I had the opportunity to work with Thai Nguyen as Project Superintendent and others on the Blue Rock team, I became more impressed with your entire organization. Your group's dependability, communication, and ability to perform flawlessly despite frequently changing conditions and schedules, has proven my early confidence to be justified if not short sighted.

Event Network considers the stores at Gilder Center to be two of our finest locations and I consider Blue Rock to be a key part of this success.

Though this was our first project together, I hope it will not be the last. I intend to look to Blue Rock for future projects in and around the tri-state region.

Thank you Cam

Michael W. Early
